### Email

f.ermenkov@gmail.com

### Address

Sofia, Ovcha Kupel 1, block 527

## Expertise

- Embedded Systems
- C
- C++
- Java
- Python
- Problem Solving

## Language

English - Level C1

## Reference

GitHub: Filip05-TUES

## About Me

I am a dedicated and motivated 17-year-old student currently studying in Technological School "Electronic Systems." With a passion for embedded systems and programming, I have gained experience in projects involving Arduino, C, C++, Java, and Python. As a good team worker, I approach challenges with a problem-solving mindset, focusing on finding solutions rather than assigning blame.

## Experience

- Developed several embedded projects utilizing Arduino, gaining hands-on experience in hardware programming and circuit design.
- Collaborated with teammates on various programming projects, fostering effective communication and teamwork skills.
- Winning an award from "DXC Technologies" by developing a tilting maze project where players navigate through a maze by tilting a controller equipped with a gyroscope.

## Education

### Technological School "Electronic Systems"

- Relevant coursework in embedded systems, programming languages, and circuit design.
- Active participation in extracurricular coding clubs and workshops, expanding practical knowledge and skills.
